PROFESSIONAL PROFILE

Frontend developer with experience in React and TypeScript, specializing in building scalable user interfaces, state management with Redux Toolkit, and working with REST APIs. Experience in freelance development, implementing functional and maintainable web solutions using agile methodologies.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, JavaScript, Redux Toolkit, React Router, Formik, Material UI
- **Version control:** Git
- **Methodologies:** Scrum

EXPERIENCE IN WEB DEVELOPMENT

Freelance Web Developer

January 2024 – Present

- Web application development using React and TypeScript.
- Implementation of global state management with Redux Toolkit.
- Integration with REST APIs.
- Development of dynamic forms with validation.
- Responsive layout and UI design using Material UI.
- Version control and collaborative work with Git.

PROJECTS

Kanban Task Manager (Trello Clone).

React | Material UI | hello-pangea-dnd

A Trello-inspired web application for task management using interactive Kanban boards.

- Dynamic creation of lists and cards to organize tasks.
- Drag-and-drop functionality to move cards between lists and reorder entire lists.
- Editing of list titles and dynamic content management.
- Responsive interface developed with Material UI.
